

Furniture Care and Cleaning – Natural Stone

A NATURAL BEAUTY

GRANITE • MARBLE • LIMESTONE • TRAVERTINE • SLATE

- We have carefully selected natural stone slabs for the unique beauty and durability only a natural stone can deliver. These one-of-a-kind stones contain naturally occurring imperfections such as color and shade variations, geological flaws, irregular markings, voids, veins, fissures, cracks, lines and/or minor separations. These characteristics are not flaws in manufacturing and do not impair the function or wearing of the materials. Differences and variations are considered the stone's natural beauty and serve to enhance the individuality of each product.
- Due to the porous nature of natural stone, we recommend the use of coasters and to wipe up all spills immediately to minimize the possibility of staining.
- To maintain the beauty of your natural stone table, we encourage the use of sealer, similar to that used on natural countertops, be applied every 6 months.
- Use only soft, slightly damp cloth.
- Never use abrasive pads, vinegar, bleach, alcohol, household cleansers, turpentine or other mineral spirits.

Label under stone tops:

WARNING

MARBLE ABSORBS LIQUIDS, PROTECT AGAINST SPILLS. IF A SPILL OCCURS. CLEAN IMMEDIATELY. THIS IS A NATURAL STONE PRODUCT. ANY VARIATIONS IN PATTERN, TEXTURE, OR COLOR ARE INHERENT IN THE MATERIAL AND ENHANCE THE NATURAL BEAUTY OF THE STONE. PLEASE DO NOT PLACE COLD OR HOT ITEMS DIRECTLY ON THE MARBLE.
